# Diffusitivity of deformable cells

Master's thesis

to obtain the second degree

***Master of Science***  
***(M.Sc.)***

written by

TIM VOGEL

(born on June 9, 2002 in FINSTERWALDE)

Day of submission: December 5, 2024

Supervised by Jun.-Prof. Dr. Markus Schmidtchen  
(Institute of Scientific Computing)

# Contents

<b>1</b>	<b>Introduction</b>	<b>5</b>
<b>2</b>	<b>Cell model</b>	<b>6</b>
2.1	Discrete cell form . . . . .	6
2.2	Cell dynamics . . . . .	6
<b>3</b>	<b>Sanity Check</b>	<b>7</b>

## List of Figures

## List of Tables

# **1 Introduction**

I will cite [Bruna and Chapman, 2012] for sure.

## 2 Cell model

\* introduce the Discrete cell form (DCF) -j, can i just reference my bachelor thesis or how should i do that?

### 2.1 Discrete cell form

\* the discrete cell form consists of a list that holds all wall points in consecutive order

### 2.2 Cell dynamics

\* area force \* edge force \* interior angle force \* overlap force

### 3 Sanity Check

\* After introducing cell model and dynamics, we want to check whether it shows the same dynamics as the billiard model from [Bruna and Chapman, 2012] when setting the parameters such that the cells should have the same characteristics.

## References

## Statement of authorship

I hereby declare that I have written this thesis (*Diffusitivity of deformable cells*) under the supervision of Jun.-Prof. Dr. Markus Schmidtchen independently and have listed all used sources and aids. I am submitting this thesis for the first time as part of an examination. I understand that attempted deceit will result in the failing grade „not sufficient“ (5.0).
